

UniPak

A reliable packaging backed by very capable moulds resulting in the most extensive range of capacities and shapes in consumer packaging in Europe.

Key benefits

- available in round, rectangular, oval or square
- comfortable tamper resistance
- snap-on lid for easy opening
- IML decoration or high quality offset
- protective collar
- microwave, dishwasher and freezer safe
- single material construction for easy recycling
- 100% liquid tight
- withstands hot filling to 90° C and blast-freezing
- same lid fits several volumes

Maximise your product impact; minimise your costs

UniPak makes it easy for consumers to choose your brand. With tamper resistance - easily detectable but still comfortable for the consumer to break, standard on every pot - UniPak features a visible deterrent to tampering and offers your customers peace of mind. The liquid tight, snap-on lid is easy to remove and replace securely. Consumers also have the option for secondary use of the packaging, since the pot is microwave, dishwasher and freezer safe. UniPak's single material construction enables easy recycling.

With UniPak square or rectangular you utilise space more efficiently

Through an efficient use of space with UniPak square or rectangular you get optimised pallet utilisation for minimised warehouse and distribution costs. Optimised use of retail shelf space to accommodate high product turnover. An especially large display surface for maximum shelf impact. A protective collar protects the UniPak lid during transport and improves the stability of filled containers.

Broad range of standard sizes

The broad range of standard sizes within the UniPak series allows you to cover most applications without going to the cost and lead time of customised tooling. UniPak also enables a family image for a brand packed in different sizes. Finally, several pot volumes within each lid diameter let you simplify filling and logistics by stocking a single, versatile lid.

Differentiate your product with decoration

You have the option of photographic quality In-Mould Labelling (IML) and high quality dry offset printing on many of our UniPak sizes.
